SEM I -AG

Lista ex

b)
$$\Delta = 0 \iff a+b+c=0$$
 sau $a=b=c$

Calculati det (A)

3) Fig A =
$$\begin{pmatrix} 1+a^2 & ba & ca \\ ba & 1+b^2 & ab \\ ca & bc & 1+c^2 \end{pmatrix} \in \mathcal{M}_3(\mathbb{R})$$
Calculate det (A*)

Fie
$$A = \begin{pmatrix} 2 & -1 & 3m+4 \\ 1 & m & 1 \\ -1 & -1 & 0 \end{pmatrix} \in \mathcal{U}_3(\mathbb{Z})$$

a) Determinati m ai A' \(M_3(Z))

b) It m=0, calculati A-1. Precizati mai multe metode

5) Five
$$A \in \mathcal{U}_2(\mathbb{C})$$

Daca $\exists k \in \mathbb{N}_1 \ k \mathbb{Z} \ 2 \ a \ A^k = \mathcal{O}_{2,1} \ at \ A^k = \mathcal{O}_{2}.$

(6) Fie f: Mom(R) -> R, f(X) = det X Precipati daca f este inj, rup. surjectiva

- Fie $f: M_2(\mathbb{C}) \to M_2(\mathbb{C}), f(x) = x^n$ La se arate ca f nu e inj si nu e surj, $\forall n.7.2$
- (8) Fie $A \in \mathcal{U}_n(\mathbb{R})$ a) Daca $A^2 = O_n$, at $J_n - A$, $J_n + A$ sunt inversable b) Daca $A^3 = O_n$, at $J_n - A$, $J_n + A - n$
- 9 Fie $A = (aij)ij = \overline{n}$, $aij = min \{ij\}_{1 \le ij \le n}$ Sa se arale ca $\Delta_n = \det A = 1$
- To Fig A = $\begin{pmatrix} a & 1 & 2 \\ 1 & 1 & 1 \\ -1 & 1 & 1-a \end{pmatrix} \in \mathcal{M}_3(\mathbb{R})$ tg A = ? Disentie
- (1) Fix $A = \begin{pmatrix} 1 & 2 & 3 & 1 \\ 2 & 0 & a & 1 \\ 0 & 1 & 3 & b \end{pmatrix} \in \mathcal{M}_{3/4}(\mathbb{R})$ $a_1b = ? \text{ air } rgA = 2$
- (12) Fix $A \in \mathcal{M}_3(\mathbb{R})$, $A^{2023} 2023 A J_3 = 0_3$ a) tg A = ?b) $tg (2023 A + J_3) = ?$
